"...most significant and influential scientific papers is testimony to the extraordinary contributions among the greatest 20th century scientists." -- Ahmed H Zewail, Nobel Laureate in Chemistry, 1999

## About the Author

Considered to be the most influential chemist of the 20th century, Linus Pauling (1901-1994) led the way in developing the modern concepts of chemical bonding and their fruitful application to all aspects of chemistry and then to biology and medicine. His ideas have fundamentally transformed the way chemistry is formulated as a science and taught, and have opened up completely new fields that have grown to immense importance, such as molecular biology and molecular disease. For this pioncering work he was awarded the Nobel Prize in Chemistry in 1954, and he received countless other prizes, medals, awards, honorary degrees, etc. In 1963 he was awarded the Nobel Prize for Peace in recognition of his successful efforts, based on scientific principles of radiation biology, to halt the testing of nuclear weapons in the atmosphere. Pauling is the only person to have received two unshared Nobel Prizes.
