The publication Roman Imperial Armour: The Production Of Early Imperial Military Armour By David Sim, J. Kaminski could be a choice considering that it is so proper to your need now. To obtain the book online is quite easy by just downloading them. With this chance, you can review guide any place as well as whenever you are. When taking a train, awaiting listing, as well as hesitating for a person or various other, you could read this on the internet e-book [Roman Imperial Armour: The Production Of Early Imperial Military Armour By David Sim, J. Kaminski](#) as a buddy again.

ROMAN IMPERIAL ARMOUR: THE PRODUCTION OF EARLY IMPERIAL MILITARY ARMOUR BY DAVID SIM, J. KAMINSKI PDF

The Roman Empire depended on the power of its armies to defend and extend the imperial borders, enabling it to dominate much of Europe, Northern Africa and the Middle East. Success was, in large part, founded on well-trained, well-disciplined soldiers who were equipped with the most advanced arms and armour available at that time. This is the story of the production of that armour. Roman Imperial Armour presents an examination of the metals the armour was made from, of how the ores containing those metals were extracted from the earth and transformed into workable metal, and of how that raw product was made into the armour of the Roman army. The policing and protecting of such a huge empire required a large and well-organised force and the book goes on to consider the organisation of the army, its size, composition, the logistics involved in its deployment and provisioning and the training, remuneration and benefits offered to its men at arms.

Excellent

By [bonnie_blu](#)

The authors present a thorough and detailed analysis of the production of Roman armor in the first and second centuries C.E. They examine torso armor, helmets, leg and arm armor, and shields. The authors clearly show that the Romans had a highly sophisticated understanding of metal working and even produced low slag iron and steel, which modern scholars and metallurgists can not explain. Modern low slag iron and steel were not produced until the invention of machine powered rollers in the 19th century. Clearly we still

have much to learn about the ancient Romans.

Very good specific resource, Not a general information book.

By M. Sellers

This book is an awesome scholarly work on the production and distribution of Armour in Imperial Rome. It highlights the economy of the military machine that was Rome. Having said that, this is not a book to purchase for general information on Rome.
